Pet Boarding

Almost Home

Almost Home is a medical pet boarding facility for animals with special medical needs operated in a home environment. It is owned and operated by a board certified emergency/critical care veterinary technician. Almost Home provides one on one nursing care in a cozy home environment instead of a hospital setting. Pets that are boarded at our facility are treated with the love and compassion we feel all animals deserve along with the highest level of medical care. Transport to CSU available.

Canine Health Resort

Canine Health Resort (CHR) was formed in 2003 to meet the specific needs of dogs undergoing medical treatment at Colorado State University and within the local community. We provide a home environment for elderly, medically compromised or handicapped dogs needing to be away from their own homes for both short and long periods of time.

CHR is located on 75 acres of woodlands and open pasture with a half-acre spring fed pond, fifteen minutes from CSU's Veterinary Teaching Hospital. Pets reside on the ground floor of the fully carpeted home. There is direct access from the home via a ramped deck to the large, securely fenced, tree-shaded yard. Your family pet has direct interaction with the home's residents, resulting in less stress between treatments or during recovery. Transport to CSU available.
